LG Optimus G Pro Battery Replacement

This guide will help you to learn how to replace the battery of your LG Optimus G Pro.

Written By: Wesley Pate

INTRODUCTION

This guide will lead you through removing the initial covering and the battery on the LG Optimus G Pro.

TOOLS:

- iFixit Opening Tools (1)

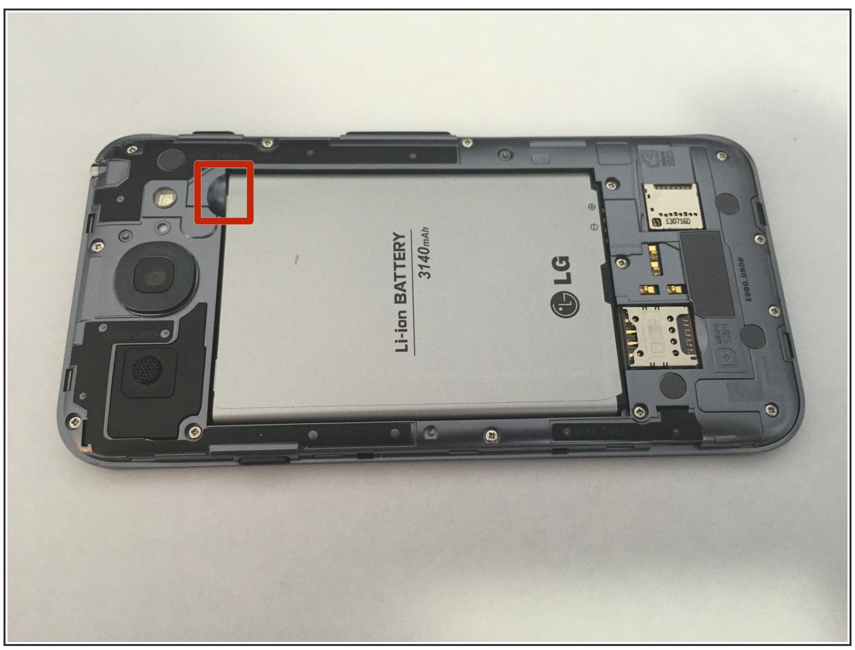

Step 1 — Remove Back Cover.

Make sure before you begin working on your device, that the device is not charging.

- Once you have access to the phone, there is a small indent on the bottom left side. Use your fingernail or a plastic opening tool to pry from here and pull off the back casing.

Step 2 — Remove the Battery.

- Once you have properly removed the outer casing, the back should look as so.
- To remove the battery, pull up from the red mark using your finger. The battery should come up at an angle, and easily be able to be removed.
- Once the battery is removed you may safely proceed to the next step.

To reassemble your device, follow these instructions in reverse order.
